

With 20% of the world's electrical consumption attributed to lighting and acknowledging the need to embrace cleaner energy technologies; the investment in creating energy efficient and sustainable lighting solutions is now of paramount importance.

Our Commitment

Spurlite Limited is committed to the innovation of energy efficient and sustainable lighting products and services; proudly providing lighting designers, installers and consumers an economical and sustainable choice in minimizing our global carbon footprint.

Our Policy

Products supplied by Spurlite Limited are designed to meet all necessary product safety and performance standards whilst conforming to all relevant industry regulations pertaining to the environment, energy efficiency, restriction of hazardous substances and proper waste control/management.

We shall endeavour to ensure that all products and services supplied by Spurlite Limited continue to meet with this outlined criteria and actively develop and embrace new technologies and methods that assure continued improvement in our policy of sustainability, including compliance with internal quality management systems and on-going staff training.
